Miller Assembly Instructions

Unwrap and familiarise yourself with all components.
Carefully turn the sofa A on to its back. Black glides are fitted in manufacture to protect the base of the sofa during transport, these are to be removed with a Phillips head screwdriver before installing the legs and do not serve a purpose once the sofa is in place.

1

Note: ensure the ground is well padded to avoid damage

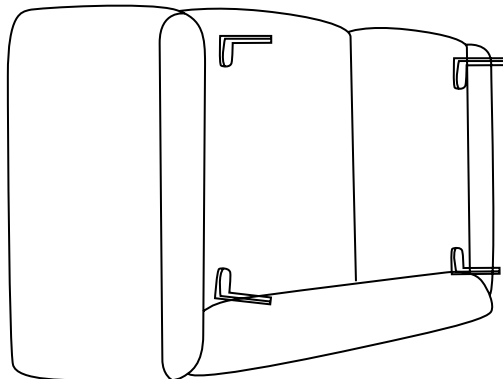

2

Align the leg B with the sofa plate C. Using the M6 bolts C provided secure the leg B to the sofa frame A.

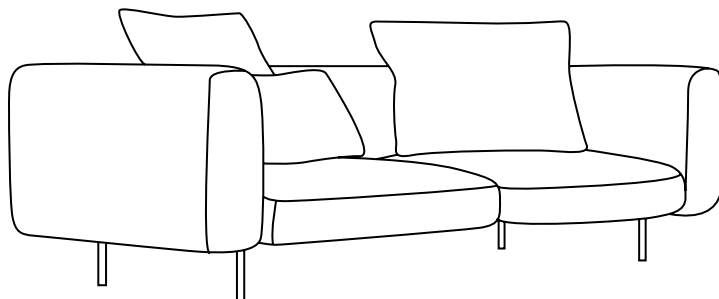

Note: Sofa plates already attached to sofa frame A.

Care and Maintenance

Our philosophy is simple, we only make furniture that lasts. Over their lifetime our products will need a little care and attention to ensure they can be enjoyed by generations to come. The following information will help you care for your Jordan products in the best possible way.

Fabric

Vacuum fabrics on a weekly basis to remove dust, dirt and any loose feathers. Treat spills and stains as soon as possible by wiping with a damp cloth, do not treat with chemical cleaners or scrub as this can alter the fabrics appearance. We recommend contacting a specialist fabric cleaner to treat difficult stains. To prolong the life of your upholstery, we recommend annual cleaning by a specialist fabric cleaner. Direct sunlight may cause colour change and aging of your fabric, for best performance we recommend positioning your furniture out of direct UV light. Please refer to the Materials Library on our website for care information specific to your fabric.

Powdercoated Metal

Regularly wipe metal with a damp soft cloth to remove particles which can abrade the surface with wear. Avoid contact with liquid, heat and direct sunlight. Abrasive cleaning products are not recommended.
