

Rocky

With a chunky hand tufted loop pile, the Rocky rug range is thick and bold. Rocky perfectly adds texture and depth to a room and creates an ambient warmth and cosiness to any space. Manufactured in New Zealand from 100% New Zealand wool, the Rocky range is durable, hard wearing and soft underfoot.

Rocky is part of The Jordan Made to Order Rug Collection. Offering a selection of customisable premium locally made, 100% New Zealand wool rugs, all produced on a made to order basis. With four unique textural qualities, offered in a selection of Jordan signature colours and available in rectangular, square and round profiles. The range is available in a selection of standard sizes or available for customisation. If you would like to find out more about customising, please contact your closest showroom.

Custom Sizing

As part of the Jordan Made to Order Collection, we offer custom size rug options. This service is only available in-store via our sales reps. This allows our customers to tailor and specify the size of the rug, to fit perfectly in their desired space. Maximum size without seams 366 x 500cm (Specifications over this size will require seams). Custom rugs will have a lead time of 3 - 5 weeks + local freight lead time.

Please Note: For custom rugs over 366 x 500cm and up to 366 x 1600cm will require additional seams to join multiple rugs together. Additional lead times will also apply to custom rugs over 366 x 500cm.

For more information on custom sizing please contact your local showroom.

Delivery Details

All rugs are delivered by our specialist furniture and rug freight carriers. Deliveries include unpacking for inspection by client & rubbish removal. Our carriers are approved to move 1-5 pieces of furniture to lay a rug in place. Please note local freight lead time apply and are subject to location. These times can vary due to unforeseen circumstances and freight delays.

Shedding and Loose Fibres

Please note all rugs may shed and have loose fibres. Shedding will take place mostly in the first 1 - 6 months of the rugs lifetime, then will slow over time. High traffic areas may always have a small amount of shedding. Simply vacuum any shedding fibres. For loose threads or ends - do not pull, simply clip them carefully with fabric scissors.

Care & Maintenance

The positioning of your rug will have an effect on the longevity and appearance of your rug over time. Avoid direct and continuous exposure to sunlight. Vacuum regularly to prevent dust and crumbs from settling into the pile. Rotate rug occasionally to equalize wear.

Spot Cleaning

Treat any liquid or food spills immediately. Remove any solids before cleaning. Place a clean cloth or unprinted paper towel directly on the liquid to absorb the spill. Following this use a clean cloth, dampened with water and dab the affected area, do not follow a circular motion or scrub, simply dab and blot. Absorb any excess moisture after cleaning with a clean dry cloth or towel. For dirt marks, such as soil, simply allow the soil to dry and vacuum. If stains or marks remain, contact a professional rug cleaning specialist.

Professional Cleaning

After time your rug will require professional cleaning. Any persistent or large stains are best removed by professional cleaning. We recommend contacting a professional rug cleaner when Jordan rugs. Always provide the details of fabrication and material to the specialist. The Made to Order Collection may be cleaned by hot water extraction also known as steam cleaning. Always ensure this is carried out by a rug cleaning specialist and a reputable operator. Ensure that the operator treats an isolated test area prior to treating the entire rug. Always ensure satisfaction with the test result before proceeding to all areas. We recommend rugs are then dried using blow heaters after steam cleaning to remove all traces of moisture.

Please contact Jordan for our recommended specialist cleaning contacts.
