

Odie Table Light

Odie is a minimal table light with a delicate and ethereal quality. Odie is hand blown from borosilicate glass using a special cold blowing technique. The rapid cooling of the glass creates a unique pattern in each piece giving a raw appearance accentuated by the visible mould seam. This natural appearance is juxtaposed with the brushed aluminium housing, giving the light an elegant purity. Odie has a warm white LED light source with a domed acrylic diffuser and comes with a dimmable switch.

Key Features

- Cold Blown Borosilicate Glass
- Soft Frosted Finish
- Warm White LED with opal acrylic diffuser
- Anodised aluminium body
- Table light with dimmable in-line switch

Table Light

OD17_1
