# Paulie

MODULAR SOFA SYSTEM

Bold from every angle, Paulie is defined by its sculptural silhouette and distinctive rhombus-shaped profile. Available in curved or angular modules, it offers two distinct expressions: soft and fluid or sharp and structured.

Paulie draws on two core ideas: creating landscapes that are inspiring, dynamic and sculptural, while also being practical and innovative. A modular sofa that is shaped by possibilities, defined by contrasting forms and versatile fabrics.

## MADE IN MELBOURNE

Developed in Melbourne by a team of designers and craftsmen, each piece was carefully prototyped, refined and made with a shared commitment to thoughtful design, material integrity and how it will be lived with over time. From first sketch to final assembly, every step is considered, ensuring each form is as functional as it is expressive.

## DESIGN FEATURES

### ANGLED MODULES

With sharp, geometric edges and a distinctive parallelogram profile, the angled modules bring structure and clarity to the form. Bold and directional, they create strong lines and are especially striking from the back, designed with as much consideration as the front.

### CURVED MODULES

Soft and fluid, the curved modules offer a sculptural counterpoint to the angled forms. Inspired by classic modular seating, their smooth arcs bring ease and flow to any setting, ideal for more organic layouts and relaxed environments.

### TIMBER TOP

The timber-topped wedge adds warmth and functionality. It acts as a surface for shared use, while creating space and rhythm between upholstered forms. A refined moment of contrast within the configuration that can also house integrated power where needed.

### TWIN NEEDLE STITCHING

Twin needle stitching adds a refined, tailored finish. This subtle detailing enhances the form and gives the sofa an elevated, considered look.

## POWER INTEGRATION

Power is seamlessly integrated into the Paulie range with a selection of Echo modules, adding function without interrupting flow or visual clarity. Whether positioned along the side of a module or placed on top for wireless charging, power units are customisable to suit the layout. Available in black or white.

## DESIGNED TO EVOLVE

Paulie is designed to adapt. With curved and angled modules, backed or backless options and integrated power and table elements, it can be reconfigured to suit any setting. From hotel lobbies and airport lounges to restaurants, breakout spaces, libraries, universities, and commercial workspaces, its flexibility invites endless interpretations whether for gathering, waiting, working or unwinding.
