#### NanoPlex<sup>™</sup> general description

NanoPlex NPS-06-01-04A Universal Relay ISP-Channel Multiplier allows the expansion of the number of channels of ISP-Programming tools, while also offering galvanic isolation. The total number of switched signals is 28. NanoPlex is used on PCBAs production lines, in ATE-controlled ISP programming. Thanks to its ultra-small size (only 51.0- x 66.5-mm), this NanoPlex model takes easly place in Test Fixtures. Designed for piggyback mounting, NanoPlex is universal and compatible with all types of ISP Programming tools.

## **Recommended Readings - Further Documentation**

Before starting, please study the following essential papers:

- NanoPlex NPS-06-01-04A Data Sheet
- NanoPlex NPS-06-01-04A Flexibility Application Note

*'NanoPlex NPS-06-01-04A Flexibility Application Note'* clearly describes NanoPlex **modularity** and how to deploy **multiple units** in order to create high-density ISP Programming Multipliers with an **unlimited number of channels**.

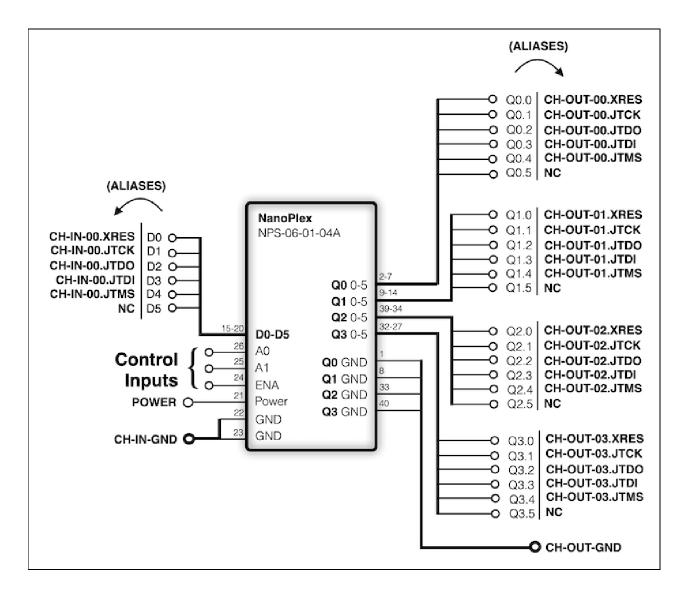

# Cypress PSoC3 (JTAG)

Signals required for ISP Programming are:

- XRES
- JTCK
- JTDO
- JTDI
- JTMS

The most convenient way to ISP program multiple instances of this device through NanoPlex is using this model in **1x4 operating mode**. 1 NanoPlex input channel is multiplied to 4 separated, galvanic isolated output channels.

On the following mode examples diagram, NanoPlex signal names are assigned with aliases (texts are in **bold**).

# Using multiple NanoPlex NPS-06-01-04A units

NanoPlex NPS-06-01-04A product is modular by design. Several units can be deployed in order to set-up a very large, limitless channel-multiplier. The advantage of using more units is a faster and less expensive substitution.

Please read '<u>NanoPlex NPS-06-01-04A Flexibility Application Note</u>' to discover how to set-up a switching system with the **number of channels as high as your application requires**.

# **About Manta Systems**

Manta Systems is a high-tech company, global leader in high-density signal switching for In-System Programming (ISP) and Testing Systems. The company targets the electronic boards assembly market, where a high number of connections is required. Manta Systems flagship product is NanoPlex<sup>™</sup>, a series of Channels Multipliers for In-System Programming (ISP) and Testing instruments. NanoPlex is the **world's first universal tool** providing end-user with the possibility of having compact, easy-to-use, professional, reliable In-System Programming (ISP) and Testing Channel Multiplication functionality.

## Warranty

All Manta Systems products are covered by a **three-year warranty** against defects and workmanship from the purchase date. The warranty only covers products when properly installed and used.

# Orders

All NanoPlex<sup>™</sup> Series products are generally **off-the-shelf**. Shipping is within **24 hours** from order reception. **Free shipping** & 30-day money back guarantee.
