

# DIY Spring Globes

What you will need:

- 1) Jar with a lid
- 2) Twig as big as your jar
- 3) Blossom
- 4) Water
- 5) Strong glue (might need an adult helper)
- 6) Gloves

Instructions:

Step 1: Take your jar lid and glue the bottom of your twig to the inside of the lid to make your tree trunk.

Step 2: Fill your jar with blossom.

Step 3: Add water to your jar.

Step 4: Once your twig is securely attached to the inside of the lid and the glue is fully dry, tightly screw your lid onto your jar filled with blossom and water.

Step 5: Turn your jar upside down so it is standing on the lid and watch your blossom float around in your finished spring globe.
