# What You Will Need:

- Colourful Pom Poms
- Printer - with a parent supervision!
- Caterpillar Colour Matching Mat Printables
- Paper
- Glue
- Pens / Crayons / Colouring Pencils

# Step By Step Guide:

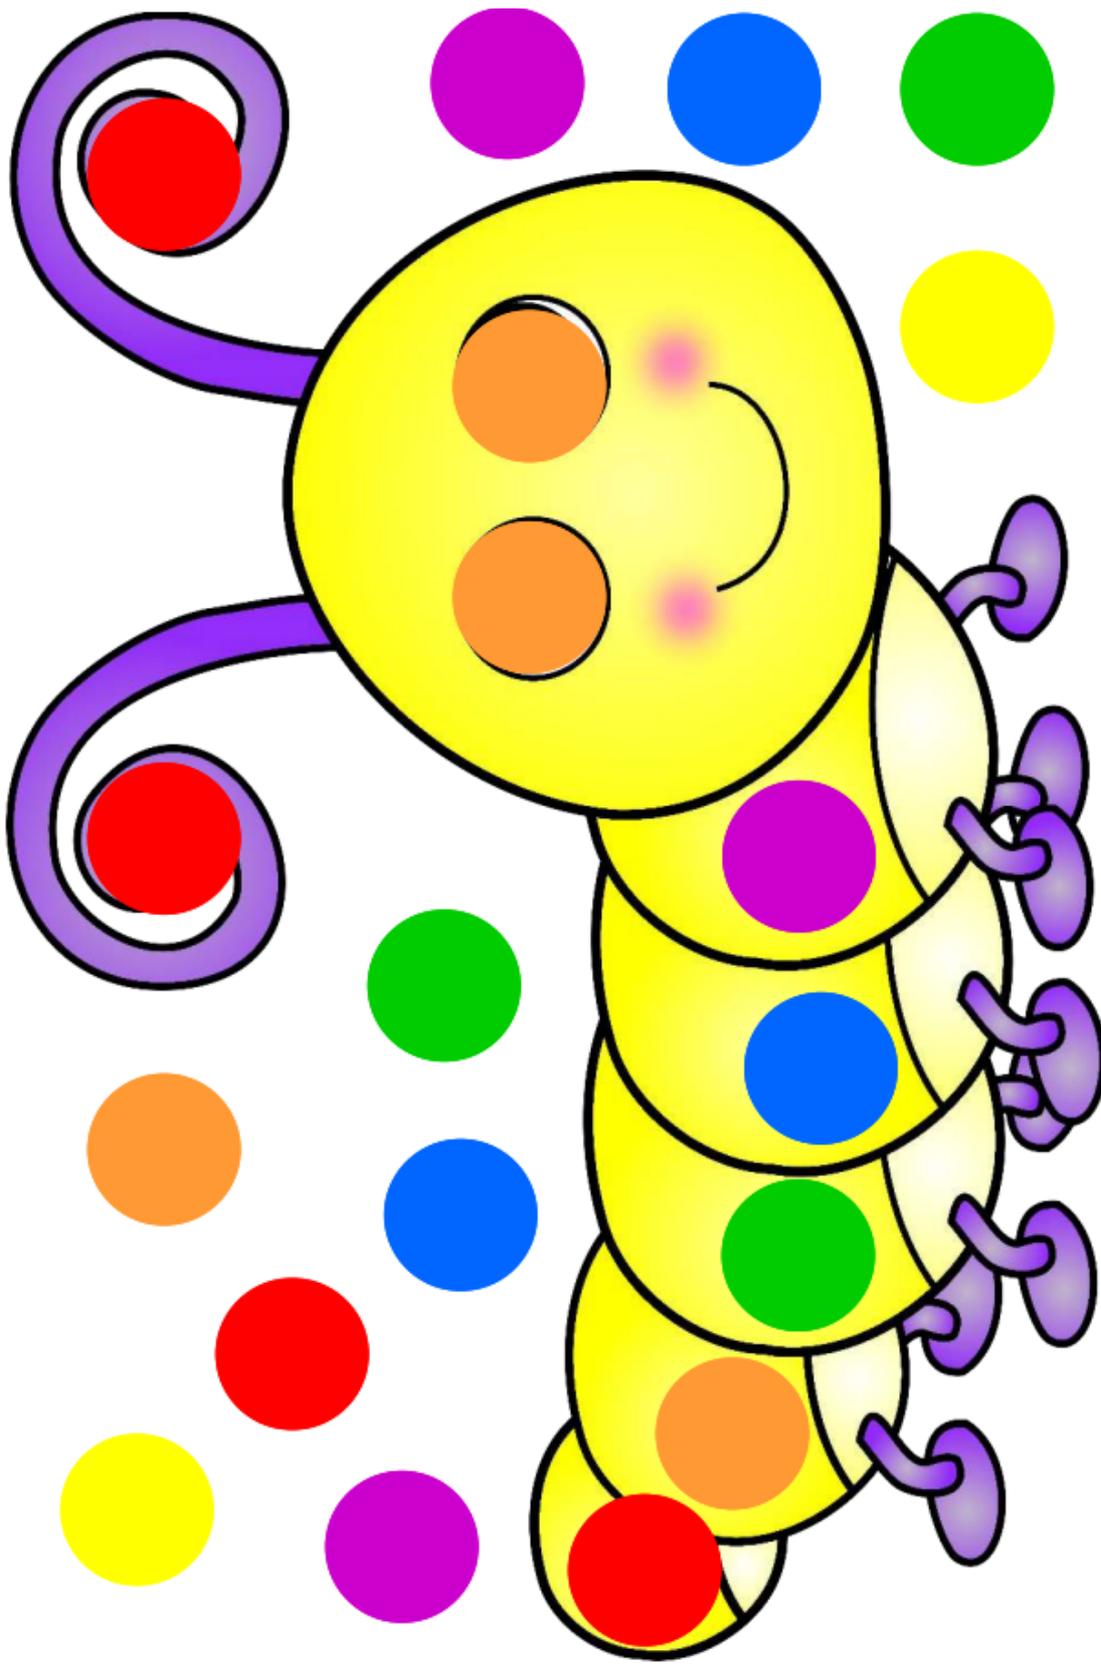

1. Begin by printing out the Caterpillar Colour Matching Sheets - with a parent or guardian supervision!
2. Then, get all your Pom Pom's together
3. Place the correct coloured pom poms onto the correctly coloured dots on the activity sheet
4. You can either glue the pom poms down or, just rest them so you can re use the sheet
5. Eventually, you should have a caterpillar covered in colourful Pom Poms

# Do Caterpillars Have Teeth?

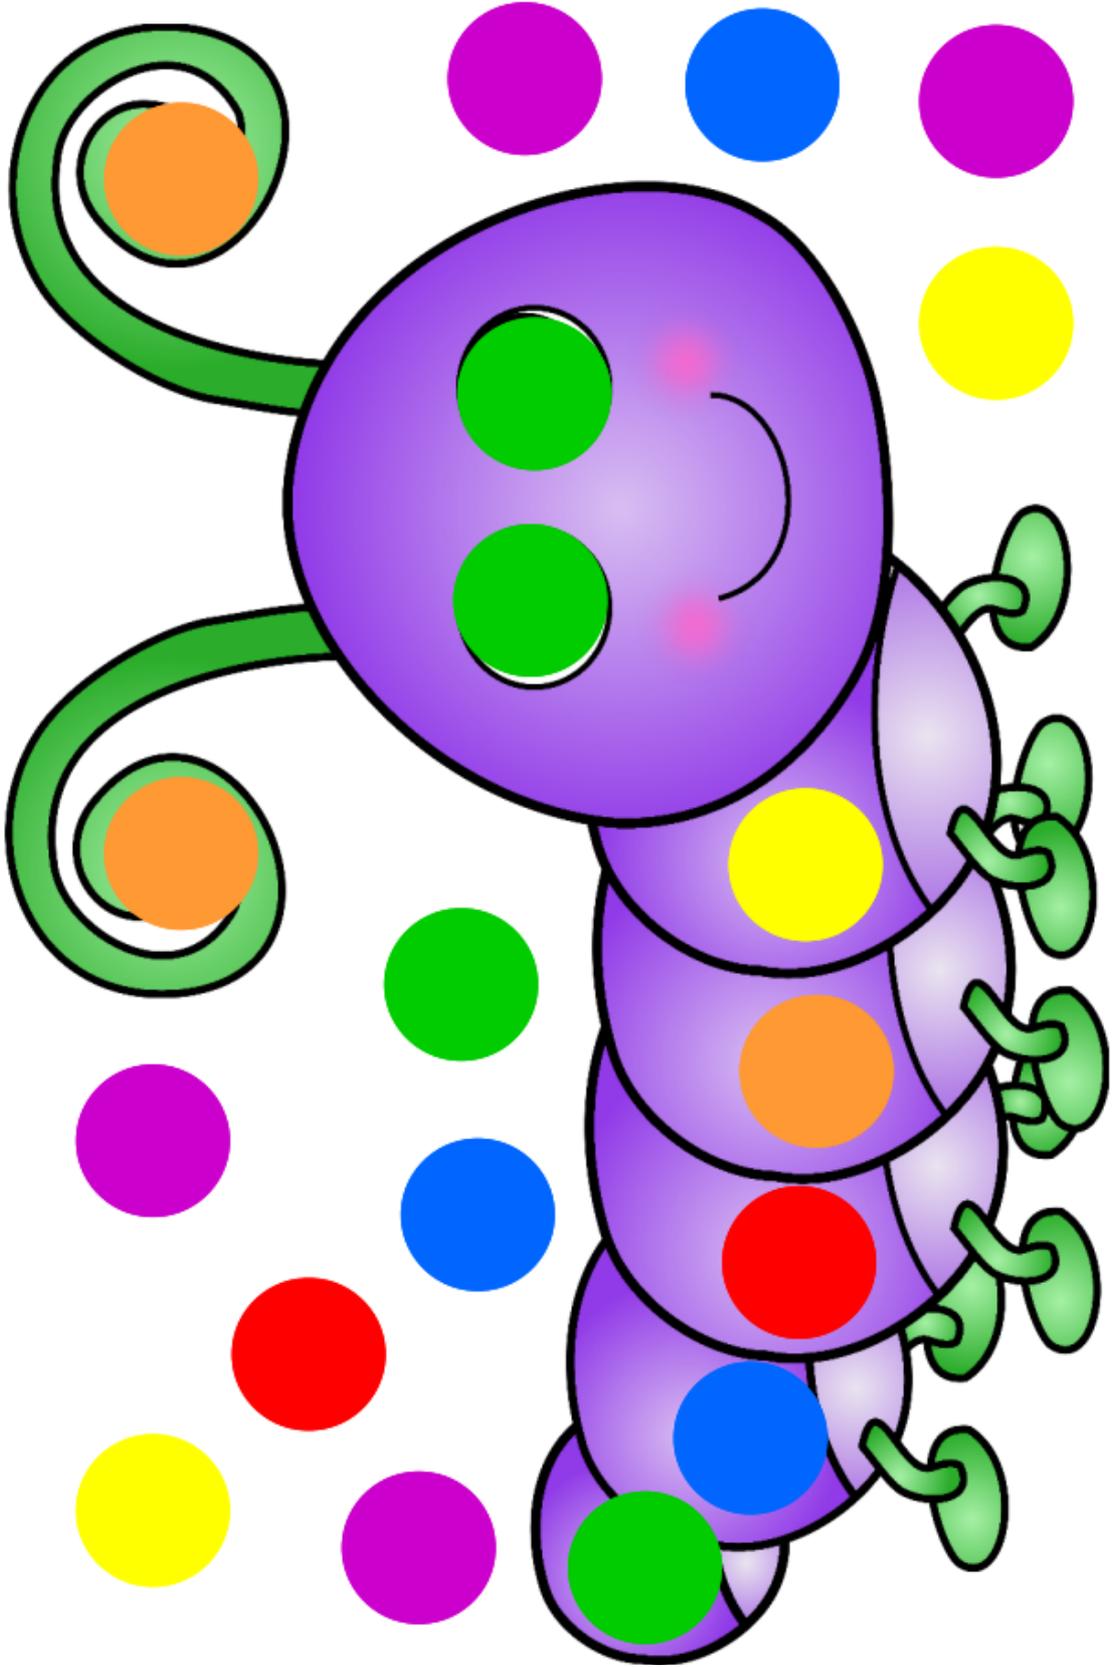

Well the answer is simple. Caterpillars have opposable toothed mandibles. Insect mandibles hang near the insect's mouth and allow the creature to grasp, crush and cut food. So whilst the caterpillar does not have teeth, it has toothed mandibles.
