REGISTRATION

#### SETTING TIMER & PRUGRAMMING THE BATTE

Day and Time - Selecting this option will allow you to set the day of the week and time that the battery will shut down at. Great for weekly schedules. Total Hours - Selecting this option will allow you to set the total number of operating hours allowed before the battery will shut down. Maximum Set-

battery will shut down. Maximum Setting: 1200 hours. Ideal for mobile sites and maintenance vehicles. Or when worker is required to unlock batteries at multiple times throughout day.

Calendar Date - Selecting this option will allow you to set the exact calendar date that the battery will shut down on. Perfect for extended job durations or for when you do not wish to have an adaptor on a site.

Choose when battery shuts off by (a) day, (b) hour, and (c) calendar date. Click Transmit.

#### **USE AND TROUBLESHOOTING**

#### CHECKING THE SETTINGS OF THE BATTERY CARTRIDGE OR THE ADAPTER

NOTICE: You can check whether the battery cartridge has expired by pressing the button (b) on the cartridge. If the battery cartridge is past its expiration date, all segments of the level indicator (a) will flash.

NOTE: If the battery cartridge will expire in approximately one hour, all segments of the level indicator (a) on the battery cartridge flash.

Load battery. A blue light will appear. Timer will apply. Congratulations you are done.

SYMPTOM	CAUSE/REMEDY
The AWarning lamp blinks.	<ol> <li>Setting is not in Timer Mode or Resgistration Mod when setting PIN or depositing more time in the b</li> <li>PIN numbers between BPS01 and battery do not r</li> <li>Low cell battery in BPS01</li> </ol>
The adapter malfunctions.	If you are using the PC app, connect the PC to the adapter before operating the app.
All segments of the level indicator on the battery cartridge flash.	The battery cartridge will expire in approximately one hour.
