

COWAY AIRMEGA 250

The powerful next level
in air purification.

With coverage of up to 930 square feet, this advanced air purifier with Green True HEPA™ filtration wraps any space in clean air, 24 hours a day.

Coway's award-winning engineering and tons of advanced features are packed into a sleek, modern design, culminating in the powerful next level in air purification for your home or business.

Key Features

• Incredible 930 square feet of coverage

Powerful purification of every square inch of air up to two times per hour in a 930-square-foot room, depending on fan speed.

• Powerful 3-Stage Filtration System

The pre-filter and the Max2 filter set combine to help you breathe easier. This Coway air purifier removes up to 99.999%* of nano-sized particles down to 0.01 micron, which is smaller than most allergens, bacteria, mold and viruses.

*Coway air purifiers have been tested according to the Korea Air Cleaning Association standard on a particle size of below 0.01µm and on maximum fan speed in normal room temperature and humidity conditions. According to Airmega 250's test report, 99.999% of 0.01µm particles are removed within 12 minutes. (Tested with Airmega AP-1216L, AP-1512HH, 150, 300, 250, 400)

• Real-Time Air Quality Monitoring

A sensor constantly monitors your air quality, and the indicator light lets you know how your air is doing, from good (blue) to very unhealthy (red). In Auto mode, the fan and purification levels are adjusted as needed—providing a new level of clean in real-time. (PM10 & PM2.5 particle sensor)

• Washable Pre-filter

The easy-to-clean reusable pre-filter captures large particles like hair, fur and dust in its micromesh, so the HEPA™ filter can work more effectively, and Coway's EZ release design makes maintaining it as simple as slide, wash and hang dry.

• Green True HEPA™ Filter

Coway Green True HEPA™ technology helps you breathe safer and cleaner air by clearing away unwanted contaminants. Certified in the world of air purification, Green True HEPA™ filters work around the clock to remove particles from the air.

• Smart Mode

Airmega adapts to its surroundings, adjusting modes and fan speed as needed with the room's air quality and conditions.

1. Auto Mode

Automatically adjusts the air speed according to the current air quality around the product, from level 1 (good) to level 4 (very unhealthy).

2. Sleep Mode

To reduce noise and power consumption, Sleep Mode activates when the room is dark and the air quality is good for 3 minutes.

3. ECO Mode

If the pollution level remains good for more than 10 minutes, the fan stops automatically to conserve energy.

• Rapid Mode

When the air quality is in need of a boost, Rapid Mode is activated to circulate it, running at maximum power until it's deemed clean. It's a much-needed quick burst of fresh air in the form of high-energy circulation.

• Timer

Set to automatically turn off after 1, 4 or 8 hours to save energy when you leave home or go to bed.

• Filter Replacement Indicators

Lights indicate when the filters need changing, so no need to keep track yourself.

ABOUT COWAY

Our obsession with home health began in Korea in 1989. Today, Coway is proud to bring our award-winning products and home health expertise to the US with Coway Airmega air purifiers, Coway Bidetmega for bathrooms and Coway Aquamega water purifiers.

Since our founding, Coway has become a global leader in intensive research, engineering and innovation, amassing over 5,000 intellectual property rights in all.

The Coway R&D Center, an environmental technology research institute, has 366 researchers, developing technologies around all aspects of life. The center also serves as our environmental quality, design and cosmetics institute.

Whether researching billions of data points to document air quality, conducting hundreds of tests to create the perfect seat for every body shape, or employing twenty-three certified water sommeliers—when we say we're obsessed with health, we mean it.
