

1. Pre-washing your fabrics and tea towel is recommended, but not required
2. Apply fusible web to the back side of fabrics for appliques - follow the manufacture's guidelines for the heat setting.
3. Cut out the shapes as desired, but think about how you will stitch around the objects, you may wish to leave an easy path for stitching.
4. Press all of the wrinkles out of your tea towel, and arrange the design. Remove the paper from the fusing as you layout your design.
5. Follow the manufactures guide lines to final set the appliques to the towel
6. Using either free motion machine stitching or standard stitching secure the appliques on all exposed edges.
