

You may build your pockets to custom fit your tools, these are just my measurements.

1. Prep your timetex frame using two layers, but leaving a gap for the spine of the journal.
2. Prep your fabric pieces, and pockets, Make sure to add your velcro to pockets before adding to base fabric.
3. Sew in your pocket channels for your tools
4. Add fabric backing
5. slide Timetex frame in
6. Topstitch to close and add the strap at the same time.
