

Millimeter Wave Radar Sensor

Using 24G millimeter-wave radar technology, it can accurately detect motion, micro-motion, and stationary states.

Flexible Installation & Range

Flexible with wall, ceiling, adhesive, and magnetic mounting, its base permits 45° folding and 360° rotation, covering a 20ft range.

Smart Home Integration

Works with multi-ecosystem and smart devices using EVVR Center Lite, automate your home, create any automation on EVVR Console.

Built-in Light Sensor

This two-in-one sensor, built with a light sensor and motion detection, is ideal for enhancing home automation applications.

Real Time Alerts

Works with your camera security system, and sends immediate alerts via the EVVR App when unexpected activity is detected.

24 G MICROWAVE

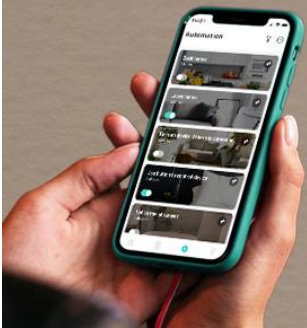

Static Human Body Existence Recognition

The sensor uses advanced 24G microwave technology to detect minute movements, intelligently maintaining lighting even when you're stationary.

Compatible with EVVR Center Lite

The Center Lite allows for flexible setup of numerous automation scenarios. Works with its sensitive 24G microwave technology, it can create more possibilities for various smart devices based on different human states.

Advanced Flow Creation
on EVVR Console

Easy to Install Anywhere

The sensor base uses simple adhesive and magnetic suction methods.

This makes it perfect for setting up in any location or situation on on any flat surfaces or metal surfaces.

Maximized Sensing, Big Angle

It covers vast distances and wide angles, offering 60° detection at 6m, 140° at 5m, 180° at 3m, and a 20ft range, uses a magnetic base allowing 45° fold and 360° rotation.

Smart Living Room

The sensor detects your home movements, auto-playing music and closing curtains upon return. It senses your nighttime movements, gently lighting up the room if you wake.

Smart Bathroom

The sensor illuminates the bathroom, opens the toilet, keeps lights on even when you're stationary, plays your music, and adjusts temperature for a personalized experience.

Smart Sensing for Smarter Living

Home Security

On your departure, the sensor turns off lights, activates the security camera and sends immediate alerts for any unexpected activity detected.

Home Safety

The sensor alerts and automatically secures hazardous areas when babies, seniors, or pets approach, triggering alarms via smart devices in emergencies.
